Hey Dan,

I'm a little concerned about ownership on all of the waste piles. I only determined ownership to locations that had a lat/long and sample ID (based on the original table that was provided to me in March/April and info that is in the viewer?. Are the waste piles at the same lat/long as the sample locations that were identified? Do you have lat/long of the waste piles?

Also, could we add the fluvial sample IDs to the table to make sure we're talking about the same locations?

If we could talk about this sometime tomorrow, that would be great. I am in meetings from 9am-2pm straight.

Hi Dan and Liz,

Attached is the Excel version of the tables for the three Animas events.

Thanks,

Leslie

Hi

I am looking for the Excel version of Table A.7-6 from the final Animas SAP. Can someone please send that to me and 'cc Liz as well.

Thanks!

Dan
